Colin **Grégoire**
Data Engineer

With 9 years of programming experience, primarily in Python, I focus on developing data-driven solutions. I have experience integrating machine learning models, automating processes, and managing SQL databases. I use tools like Airflow to handle workflows and optimize systems. I have also worked on managing virtual infrastructures (VMs, NAS Synology, Proxmox) and organizing technical projects.

Soft skills
- Proactive
- Resilient
- Autonomous
- Collaborative
- Curious

Langues

French: mother tongue
English: B1 level

Tech skills

Python SQL Database Apache Airflow Java Git PHP Machine learning

Experiences

BeCode.org | since juin 2024
Bootcamp Data Engineer

- 7-month intensive training
- Learning through active pedagogy: practical project work, both in groups and individually
- Aligned with the expectations of the professional world

Project experience:
I made a project that predicts football match outcomes using a Random Forest model. The workflow, including data scraping, model training, and predictions, is fully automated via Airflow.

Huggy's Bar of Soumagne | 2021 - 2024
Student job, kitchen and dishwashing

Formation

Helmo Ste-Marie | 2023 - 2024
Bachelor in Managment IT

Helmo Ste-Marie | 2020 - 2022
Bachelor in Cybersecurity

St-Jean Berchmans & Ste-Marie | 2017 - 2020
Computer Science option, obtained CESS
